Co-Chairmen: Velko Valkanov (Bulgaria), Ramsey Clark (USA), Sergei Baburin (Russia)

To the United Nations Office at Vienna, 11 March 2011

**Protest Note**

We bring to the attention of the Secretary-General and protest the following:

That the ICTY is a criminal tool of NATO acting under the cover of the UN symbol. That the Security Council has no jurisdiction under the UN Charter to create ad-hoc criminal tribunals,

That their existence is justified under Chapter VII of the Charter dealing with "peace and security" therefore the tribunals have a political purpose not a juridical purpose,

That the appointment of ICTY judges and prosecutors is controlled by the principal NATO aggressor against Yugoslavia-the USA,

That the prosecutors have engaged in selective prosecution on a massive scale - 80 percent Serbs, zero percent NATO officers and leaders,

That arrests and indictments are made for political and propaganda purposes, and therefore the prisoners are political prisoners of the UN,

That arrests are made without evidence and long pre-trial detentions are due to the need to fabricate evidence, as exemplified by the case of Dr. Sesejl,

That prosecutors rely on manipulated and intimidated witnesses, withholding of exculpatory evidence, intimidation of independent counsel trying to present strong defences, violations of right to equality of arms, full answer and defence,

That accused are manipulated to make deals,

That there is infiltration of the NATO intelligence agencies in all sections of the ICTY,

That these illegal and immoral practices have 3 objectives:

- to propagate a false history of the events in the republics of Yugoslavia,
- to demonize and discredit the accused and the political, administrative and military institutions that tried to defend the integrity and sovereignty of Yugoslavia,
- to cover-up the criminal aggression against Yugoslavia by the NATO powers and all crimes connected to that aggression including the cover-up of the obscene murders of Serbs by the KLA proxies of NATO for the purpose of trafficking in organs as detailed in the Marty Report and condemned by the PACE.

That the death of President Milosevic, a head of state, was the direct consequence of the deliberate withholding of necessary medical treatment which resulted in his death, a criminal homicide.

That the same characterizations apply and practices are used at all the ad-hoc tribunals for Rwanda, Sierra Leone, Cambodia, Harir i- a cesspool of US injustice and persecution of political prisoners.

- We therefore demand
1. the immediate abolition of the entire system of ad-hoc tribunals, the immediate release of all political prisoners held by them, and a public inquiry by independent jurists and scholars into the practices, conduct and operations of these tribunals and those responsible,
  2. public and independent inquiry into the killing of President Milosevic.
